

Resume

Name: Lei Ma

Position: Post-Doctoral Fellow

Business Address: University of Toronto, School of Civil and Mineral Engineering, Toronto, ON, Canada M5S 1A4

Phone: +1 416-827-2634

Email: leii.ma@utoronto.ca or leima.3106@gmail.com

ORCID ID: 0000-0002-8775-3122

Google Scholar Profile: <https://scholar.google.com/citations?user=RjAcGaUAAAJ&hl=zh-CN>

Website: <https://leima1006.github.io>

PROFESSIONAL EXPERIENCE

Post-Doctoral Fellow

01/09/2024 - Present

University of Toronto, Canada

School of Civil and Mineral Engineering

Advisor: Professor Daman Panesar

Research title 1: Carbonation-activated microstructural refinement in GUL-GGBFS blended mortars: shrinkage mitigation and strength enhancement

Research title 2: Effect of GGBFS content on the durability of concrete exposed to freeze-thaw and salt scaling

Post-Graduate Intern

10/04/2023 - 29/09/2023

Holcim Innovation Centre, France

Advisor: Dr Qing Zhang

Research title: Assessment of the feasibility of applying the ring test to evaluate the cracking properties of 3D printed concrete

EDUCATION

PhD in Civil Engineering

01/09/2019 - 13/03/2024

Southeast University, China

School of Materials Science and Engineering, Civil Engineering Materials

Advisor: Professor Yamei Zhang

Research title: Study on the impact and mechanisms of early drying environments on mechanical and shrinkage properties of 3D printed concrete

MSc in Civil Engineering

01/09/2016 - 30/06/2019

Xinjiang University, China

School of Architectural Engineering, Civil Engineering

Advisor: Professor Yong Wen

Research title: Optimisation on the sulphate resistance of grouted mortar for semi-flexible pavement

Mechanical anisotropy evolution of 3D-printed alkali-activated materials with different GGBFS/FA combinations. *Journal of Building Engineering*, 50, 104126, <https://doi.org/10.1016/j.jobbe.2022.104126>.
15. Wang, X., Jia, L., Jia, Z., Zhang, C., Chen, Y., **Ma, L.**, Wang, Z., Deng, Z., Banthia, N., Yamei Zhang. (2022). Optimization of 3D printing concrete with coarse aggregate via proper mix design and printing process. *Journal of Building Engineering*, 56, 104745, <https://doi.org/10.1016/j.jobbe.2022.104745>.
16. Liu, C., Chen, Y., Zhang, Z., Niu, G., Xiong, Y., **Ma, L.**, Fu, Q., Chen, C., Banthia, N., Zhang, Y. (2022). Study of the influence of sand on rheological properties, bubble features and buildability of fresh foamed concrete for 3D printing. *Construction and Building Materials*, 356, 129292, <https://doi.org/10.1016/j.conbuildmat.2022.129292>.
17. Liu, C., Wang, X., Chen, Y., Zhang, C., **Ma, L.**, Deng, Z., Chen, C., Zhang, Y., Pan, J., Banthia, N. (2021). Influence of hydroxypropyl methylcellulose and silica fume on stability, rheological properties, and printability of 3D printing foam concrete. *Cement and Concrete Composites*, 122, 104158, <https://doi.org/10.1016/j.cemconcomp.2021.104158>.
18. Zhang, C., Deng, Z., **Ma, L.**, Liu, C., Chen, Y., Wang, Z., Jia, Z., Wang, X., Jia, L., Chen, C., Sun, Z., Zhang, Y. (2021), Research progress and applications of 3D printed concrete. *Bulletin of the Chinese Ceramic Society*, 40, 1769-1795, (in Chinese).
19. **Ma, L.**, Wen, Y., Zhang, W., Wang, C., Peng, B. (2019). Study on resistance to sulfate attack of poured cement mortar under dry and wet cycle. *New Building Materials*, 46 (03), 36-40, (in Chinese).
20. **Ma, L.**, Wen, Y., Peng, B., Wang, C., Zhang, W. (2019). Study on strength of poured cement slurry in semi-flexible pavement in different ages. *Concrete*, 06, 147-150, (in Chinese).

Conferences Presentations

1. **Ma, L.**, Panesar, D. Carbonation-activated microstructural refinement in GGBFS-blended

mortars: Shrinkage mitigation and strength enhancement, 6th CSBE Partner Meeting, Toronto, Canada (09/2025).

2. **Ma, L.**, Panesar, D. Is accelerated carbonation a benefit or burden to cementitious materials? A look at volume stability. *Embodied GHG Symposium*, Toronto, Canada (05/2025).
3. **Ma, L.**, Zhang, Q., Zhang, Y. The shrinkage of 3DPC, effect of surface to volume ratio, water to binder ratio, and PP fiber. *RILEM Annual Week & 1st Interdisciplinary Symposium on Smart & Sustainable Infrastructures*, Vancouver, Canada (09/2023).
4. **Ma, L.**, Zhang, Q., Lombois-Burger, H., Zhang, Y. Effect of drying environment on mechanical properties, internal RH and pore structure of 3D printed concrete. *Third International Conference on 3D Construction Printing & International Conference on 3D Printing Concrete Materials and Structures*, Shanghai, China (06/2022).

Patent

1. 3D-Printed Wall Structure for a House, 3D-Printed House, and Method for Printing. China National Intellectual Property Administration, 2023.

AWARDS

- | | |
|---|---------|
| 1. 3D Printing Housing Hack Challenge, Holcim Innovation Centre | 01/2022 |
| 2. Design Innovation Award | 06/2021 |
| 3. “Merit Students” Award, Xinjiang University | 04/2019 |
| 4. “Outstanding Graduates” Award, Xinjiang University | 01/2019 |
| 5. Master's National Scholarship, Ministry of Education of the People's Republic of China | 11/2018 |
| 6. “The Surveying Competition” prize, Xinjiang University | 04/2013 |
